### SAF-HOLLAND promises up to 39 kilos more payload per semi-trailer!

**New air bags with plastic pistons make it possible:** SAF-HOLLAND now equips as standard the SAF INTRA series air suspensions with lighter air bags.

A new plastic piston enables weight to be saved and brings a payload gain of up to 39 kilos per semi-trailer. This weight advantage makes it under the current, difficult situation especially viable for mineral and silo transport fleets.

You can find the technical data as well as the article number for the new air bags under:

[Important Info No. 50](#)

### New Location and Wider Range.

With the takeover of the previous Georg Fischer Verkehrstechnik in Singen, a leading supplier of the commercial vehicle industry, SAF-HOLLAND has extended its range to GF fifth wheels and king pins, ball races, TRILEX-wheel systems as well as accessories for tractors, trailers and semi-trailers. The complete range can be found at:

### INTEGRAL-GUARANTEE without inconvenient paperwork:

Customers who buy a SAF INTRADISC plus INTEGRAL enjoy a particular advantage from now on. SAF-HOLLAND is now giving fully automatically the special INTEGRAL-GUARANTEE against continuous cracks in the brake disc. Customers no longer have to register or fill out extra forms. The INTEGRAL-GUARANTEE is valid for 500,000 kms up to 3 years for the 22.5"-disc and 350,000 kms up to 2 years for the 19.5"-disc according to the SAF-HOLLAND guarantee conditions.

---

### Assured Spare Parts Supply during the Factory Holiday:

The colleagues from Aftermarket are available as usual even during the factory shutdown from 3rd until 14th August. Several colleagues in the axle sales department will also be available for urgent customer queries. Shipping of axles and suspensions is unfortunately not possible during this time. We thank you for your understanding.
