YOU CAN USE

SAF-HOLLAND wishes you success today!

SAF BIGFOOT TITAN Premiere at the Solutrans in Lyon from 2nd to 6th March

The main focus of the international trade fair for transport solutions is the strategic, commercial and environmentally friendly solutions for the transport business of the future. This year SAF-HOLLAND France will be there with its own Infomobil and, as well as the usual components and systems for trucks and trailers, will be presenting the newly developed landing gear system SAF BIGFOOT TITAN.

SAF-HOLLAND with Three Customer-friendly Business Units

The organisation model is simple, transparent and, for this very reason, very successful: SAF-HOLLAND supports and advises commercial vehicle customers using three clearly structured business units. The business unit Powered Vehicle Systems supplies the heavy goods vehicle industry with fifth wheels, TRILEX wheel systems and air suspensions. The business unit Trailer Systems supplies king pins and landing gear as well as axles and suspensions to the trailer and semi-trailer industry. Finally, the business unit Aftermarket provides spare parts for all products of the SAF-HOLLAND Group.

New Sales Distribution for GF King Pins, Ball Races and Steering Wedges

The SAF-HOLLAND business unit Trailer Systems has expanded its range to include GF king pins, ball races and steering wedges to be able to meet individual customer requirements faster. All products can now be ordered from SAF-HOLLAND in Bessenbach as well as from any subsidiary or national representative.

SAF-HOLLAND Verkehrstechnik GmbH in Singen represents the Business Unit Powered Vehicle Systems in Europe

Fifth wheels with and without mounting plates and sliders as well as assembly kits and accessories at SAF-HOLLAND belong to the worldwide core business of the Powered Vehicle Systems business unit. The distribution of own brands GF, TRILEX and HOLLAND lays with the own subsidiary SAF-HOLLAND Verkehrstechnik in Singen, who also supply the corresponding original parts to markets in Europe and overseas. Managing Director Svend Koch sees the company in a good position for the future: “ Apart from standard solutions for almost all transport needs we are also developing and producing new specialized solutions, for example for off-road, emergency management and defence technology.”
