NESTLÉ Fleet runs on SAF Axles in England and Ireland

Nestlé in England and Ireland have chosen SAF INTRA axles to be able to safely manage its increasing transport volume in the future. Graham Lyon, fleet manager of Nestlé UK LGV, gives as reasons for the decision the typical SAF advantages, e.g. less weight, low running and maintenance costs as well as a first class guarantee promise. The first 17 trailers have been supplied; a further order should follow in a few months.

Awarded: PACCAR Certificate 50PPM for SAF-HOLLAND Verkehrstechnik

PACCAR is counted as one of the bigger commercial vehicle manufacturers together with world brands such as Kenworth, Peterbilt, DAF and Leyland Trucks. The company promises its customers the highest quality and therefore has strict requirements for its suppliers, for example 50 PPM (max. 50 defects per 1 million parts). SAF-HOLLAND fulfils or exceeds this demand and therefore understands the current award as special recognition and future commitment.
