Flawless: KONZ logistics is driving with 100% SAF Axles and 100% GF Fifth Wheels

Successful and in business Europe wide for more than sixty years: KONZ logistics has an excellent reputation for individual transport solutions in the part and full load area as well as in-house service and outsourcing projects. Further services include warehousing and consignment as well as packing and labelling. The company headquarters in Saarbrücken operates the very modern fleet of over 80 trailer trucks, which are all exclusively equipped with SAF axles and GF fifth wheels.

Safety-Sensor-System RECOSS for Fifth Wheels SK-S 36.20

The REmote COntrolled Safety System from SAF-HOLLAND works safely and efficiently. RECOSS informs the driver in the cab optically and acoustically about the whole coupling operation. The system is available for all fifth wheel SK-S 36.20 models and can also be quickly and easily retrofitted.

Training for Trainer

Safety is an important topic in the transport business. SAF-HOLLAND therefore actively supports the training and further education of qualified trainers for the safety test. "This visual, evaluation and functional test of commercial vehicles" so service manager Reiner Wilhelm "is a focal point of our continuing cooperation with selected local chambers of commerce."

SAF INTEGRAL Retrofit Kit increases the Resale Value

When the brake discs or bearings are to be replaced on an older trailer, then an INTEGRAL retrofit kit is particularly profitable, as supported by a retrofit campaign at LEHNKERING Euro Logistics GmbH in Duisburg. Five trailers each with a total of 900,000 km mileage were updated with the latest brake technology. An additional benefit being the maintenance of value.
