

## SAF air bags with plastic pistons for the INTRA series

From 1 September 2008 onwards, all INTRA series will come with plastic pistons as standard.

When using plastic pistons, a commercial load benefit of 13 kg per axle is gained.

In case of replacement, air bags with identical technical data such as air bag diameter and axle stroke (refer to the table below) are completely interchangeable independent of the piston version.

Technical data for air springs			
Plastic piston	Steel piston	Air bag diameter	Axle stroke
SAF 2619V		300 mm	180 mm
SAF 2919V	SAF 2918V	350 mm	180 mm
SAF 2924V	SAF 2923V	350 mm	200 mm
SAF 2927V	SAF 2926V	350 mm	260 mm

Order numbers				
Air bag with plastic piston			Air bag with steel piston	
Designation	Order number		Designation	Order number
SAF 2619V	3 228 1033 00			
SAF 2919V	3 228 1042 00	↔	SAF 2918V	3 228 1027 00 *
SAF 2924V	3 228 1041 00	↔	SAF 2923V	3 228 1031 00 *
SAF 2927V	3 228 1047 00	↔	SAF 2926V	3 228 1030 00 *

\* Steel pistons are still optionally available.

Air bags with plastic pistons for SAF MODUL series are available on request.
