

SAF® Tire Pilot Plus™ Pressure Management System

Product Announcement

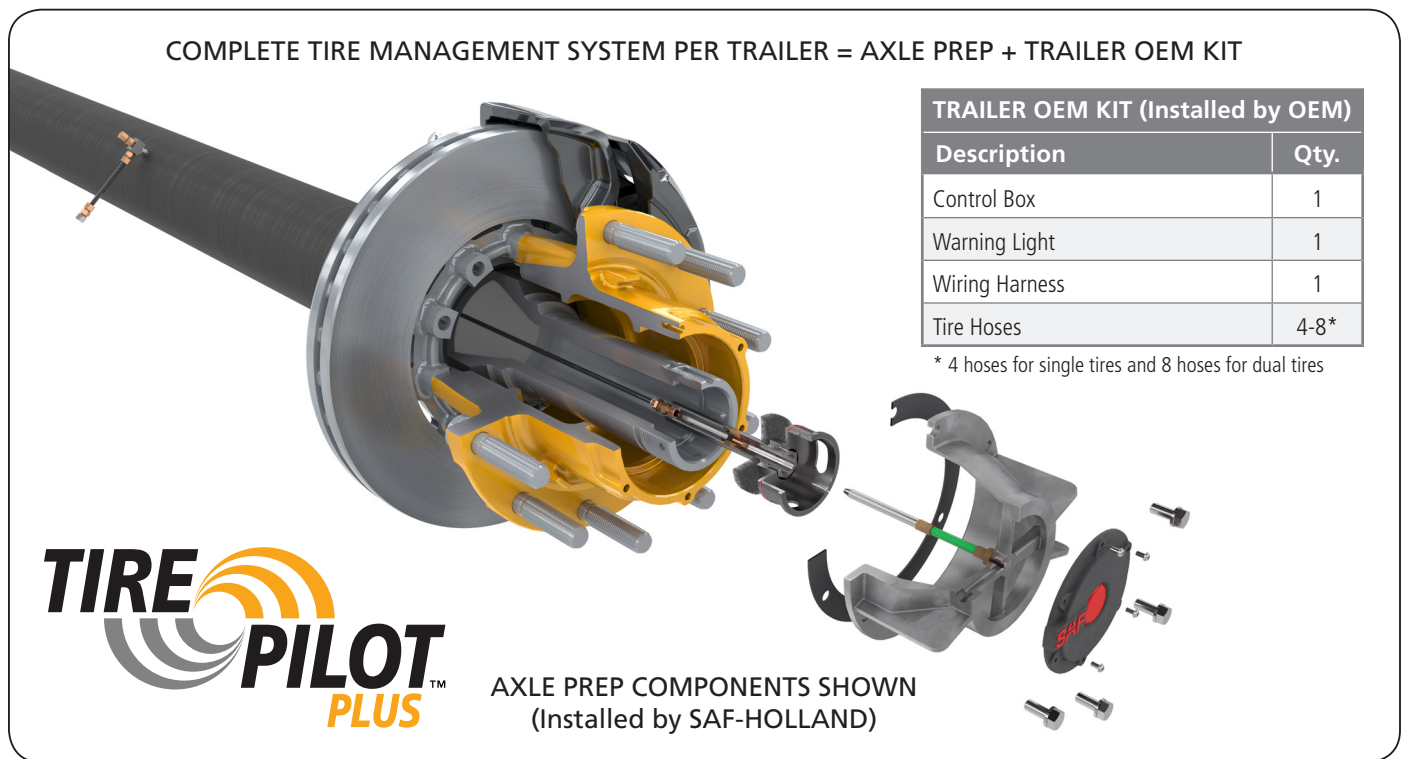

Effective: March 2019

Attention:

SAF-HOLLAND® is pleased to announce that our new Tire Pilot Plus™ tire inflation management system will be ready for production order placement as of March 1st, 2019.

The Tire Pilot Plus will become our only complete tire inflation system offering as of this date. The Tire Pilot Plus system will ship fully axle prepped by SAF-HOLLAND and remaining trailer OEM installed parts will be shipped with each order as a complete package, see parts list below.

COMPLETE TIRE MANAGEMENT SYSTEM PER TRAILER = AXLE PREP + TRAILER OEM KIT

TRAILER OEM KIT (Installed by OEM)	
Description	Qty.
Control Box	1
Warning Light	1
Wiring Harness	1
Tire Hoses	4-8*

* 4 hoses for single tires and 8 hoses for dual tires

AXLE PREP COMPONENTS SHOWN
(Installed by SAF-HOLLAND)

Other Axle Prep Options:

At this time, only the MTIS (PSI) axle prep options will still be available where the axle plugs and stators are installed by SAF-HOLLAND per order.

The current other options listed below will be discontinued:

- Stemco Aeris® (discontinued)
- Hendrickson Tiremaax® (discontinued)

Axle Drilling Options:

The only axle drilling option available will be the industry standard single hole configuration for those customers not ordering a Tire Pilot Plus system or an MTIS (PSI) prep option.

Refer to our Air and Mechanical Suspension/Axle Series ordering guides for further details.
