THE HEAVY-DUTY SLIDER SOLUTION
FOR ON/OFF HIGHWAY AND
SECONDARY ROAD HAULING

SAF CBX50 AIR SUSPENSION SLIDER AXLE SYSTEM

OPTIONAL UPPER BODY RAILS

Roll formed body rails are manufactured from high strength 80,000 KSI steel.

ROBUST SLIDER SUB-FRAME

Constructed with 80 KSI yield material and designed with two additional crossmembers, the CBX50 is the most robust and structurally rigid 50K slider on the market.

50,000 lbs.
CAPACITY

QWIK RELEASE™ PIN PULL

This patented system makes slider adjustment safe and efficient. With 20% less pulling effort than competitive models – one person can easily reposition the slider. This design also alleviates bound-up pin problems.

SWING ALIGN™

The fastest and most convenient axle alignment system in the industry. No replacement parts or disassembly is required. Axle alignment adjustment is made directly by the lead screw. Requires less than 250 ft. lbs. of torque to adjust.

MULTI-FUNCTIONAL PIVOT BUSHING

The more robust bushing with its exterior void design limits the twisting movement that could lead to premature bushing and tire wear.

LIGHTWEIGHT CAST STEEL TRAILING ARM DESIGN

Rated for 25,000 lb. capacity per axle for carrying heavier loads, the CBX50 is designed with our proven air suspension trailing arm thin-wall casting technology.

AIR SPRINGS

Capacity enhanced to meet on/off highway application demands. TOFC compliant with a standard pneumatic dump valve.

POSILOK™

Eliminates dock walk and squat. Creates a stable and safe loading and unloading operation.

DRUM BRAKE AXLE IS STANDARD EQUIPMENT

The SAF CBX50 standard configuration features a SAF X-Series 5.75" diameter axle with 16½" x 7" extended life brake linings, intermediate cams, and industry standard tapered or parallel spindles.

P89 Series
AIR DISC BRAKES

**TWO MODEL CHOICES TO MEET YOUR
FLEET'S SPECIFIC NEEDS**

The P89 model at a price point that makes sense for fleets of any size. And, the P89 Plus for premium performance. Disc brakes simply provide better performance than drum brakes. They stop shorter for increased safety and reduce maintenance for lower total cost of ownership.
