Holland is providing fifth wheel fastener kits designed to provide hardware for mounting Holland stationary and sliding fifth wheels. The four kits available are listed below. Charts are also provided giving recommendations for the number of fasteners required for proper installation. See the reverse side for schematics showing proper fastener installation.

**FASTENER KITS AVAILABLE:**

- PK-FAST-10 10 fastener kit
- PK-FAST-14 14 fastener kit
- PK-FAST-18 18 fastener kit
- PK-FAST-20 20 fastener kit

**RECOMMENDATIONS FOR THE NUMBER OF FASTENERS REQUIRED:**

The charts below show the minimum number of .62” diameter grade 8 bolts, hardened washers and grade C lock-nuts required to attach a fifth wheel with a 40,000 lbs. vertical load and 150,000 lbs. drawbar capacity onto mounting angles*.

**Stationary Fifth Wheel Mounts:**

No. Fasteners Required | Inboard Mount* | Outboard Mount*
--- | --- | ---
10 | 10 | 10

**Sliding Fifth Wheel Mounts:**

To determine the number of fasteners required for sliding fifth wheel mounts, proceed as follows:
- From the fifth wheel model number, determine the bracket code and travel length code. Read across the chart at the proper travel code until you reach the columns containing the bracket code. From this column, select the number of fasteners required for either inboard or outboard mount. NOTE: For outboard mounted fifth wheels, if fasteners are also required to attach the angles to the tractor frame, add the number of fasteners listed in the inboard mount column to the number listed in the outboard mount column.

**EXAMPLE:** FW2535-7003T4L

**INSTRUCTIONS FOR KIT USAGE (SEE REVERSE):**

* WARNING: USE FIVE (5) FASTENERS MINIMUM PER SIDE. FOR MORE INFORMATION SEE HOLLAND PUBLICATION "FIFTH WHEEL INSTALLATION INSTRUCTIONS," PUBLICATION FW-TE-14-A.
NO CLEARANCE TORQUE FASTENER TO 175-200 FT-LBS

1 THREAD MIN. MAKE SURE THERE ARE NO OBSTRUCTIONS IN BOLT AREA
