The RK-10700-C Air Line Kit has been specifically designed for use on sliding fifth wheels only and is not intended for use on any other application.

Step 1......Make sure that the air supply to the fifth wheel and slide base is turned off.

Step 2......Remove any masking that may be present on the bulkhead and union fittings.

Step 3......Connect the coiled air line by pushing it into the union fitting as shown (FIGURE 1).

Step 4......Connect the other end of the coiled air line by pushing it into the bulkhead fitting on the standoff as shown (FIGURE 2).

NOTE: If there are any undesired line interferences, there is an optional hole in the standoff that the bulkhead fitting can be mounted in.

Step 5......Turn on the air supply to the fifth wheel and slide base; check for proper function.
SLIDING FIFTH WHEEL AIR LINE KIT
