

## Holland Landing Gear Product Line Consolidation

### New product line streamline strategy continues with the introduction of Atlas 65 Series

#### Introduction

SAF-HOLLAND continues to streamline its North American Landing Gear offering with the introduction of the Atlas 65™ Series. Market accepted features and technologies from former Binkley, Austin-Westran and Holland products have been integrated into the Atlas 65™ Series' product design. The Holland Mark V Series continues its position as the flagship model in the Holland Landing Gear product line.

The Atlas 65™ model features the patented Constant Mesh gear shifting technology and the exclusive floating nut with twin-bulkhead design - engineered to ensure durable and easy operation for years to come. The images shown depict the leg-for-leg interchangeability for each landing gear model.

Atlas 65™ start of production is planned for March 2012.

#### Atlas™ 65 Features

- Improved gearbox and upper housing with bushing seals to keep water out.
- 5-Year standard Performance Guarantee with optional 10-Year Performance Guarantee.
- Available with optional Black Armour™ protective coating and NoLube™ low-maintenance system.
- Improved ratings:
  - 65,000 lbs. vertical lift
  - 34,000 lbs. side load
  - 170,000 lbs. load capacity
- Part numbers for the Atlas 65™ will change to a new numbering series – LG6 standard type code.
