

Important Info – May 2015

HOLLAND Landing Gear

HOLLAND landing gear to now be fitted with new stainless steel serial tag.

Product Change Effective May 1, 2015

The HOLLAND landing gear will now feature a more easily read serial tag. The stainless steel serial tag will include support information accessed by a QR code, along with the serial number (manufacturing code) and part number.

The new stainless steel serial tag is fastened securely to each leg under the grease fittings. This will be in place of our current stamped part number on the leg cover.

NoLube™ Serial Tag Identification

If the landing gear includes NoLube™ feature, the words “NoLube until xx/xxxx (mo/yr)” will appear on the tag*. The serial tag will also include the part number, serial number and QR Code which will take you to our maintenance document part of our website.

- * A NoLube™ landing gear will be identified on the serial tag with the words NoLube™ located above the QR Code, and showing the 10-Year after manufactured date.
