

Important Info – October 2020

SAF Trailer Slider Suspension Systems

SAF-HOLLAND IS GOING GREEN – Transitioning from Printed to Digital Product Literature

Effective Date: Transition Implementation Will Commence January 2021

Continuing our corporate sustainability initiative, SAF-HOLLAND is going digital with product support literature for all SAF trailer slider air and mechanical suspension systems. No longer will printed literature kits be supplied with product shipped from our manufacturing plants.

Product support literature will now be made available through a conveniently located QR code decal. The decal can be found on the slider front hanger for air and mechanical slider suspensions. Accessing literature digitally will assure up-to-date versions.

Scanning of the QR code with your smart device will serve up a menu list of all available technical support literature for that particular product model. Simply click and open the document of your choice.

IMPORTANT: It is recommended that Trailer OEM customers purchase all necessary trailer suspension operator safety and instruction decals in bulk quantities. Please contact your SAF-HOLLAND sales representative to coordinate the ordering process. Ordering decals in bulk will assure availability and efficient application on the OEM assembly line.

EXAMPLE - Slider Suspension Product Support Literature List PDF Accessed Through QR Code

Literature List
SAF® UltraLite & ULX40 Mechanical Slider Suspension

Technical Support Literature List October 2020

This document provides the literature related to the SAF UltraLite Slider and the ULX40 Slider/Axle System. Links to literature PDFs are provided below. Call 800.876.3929 to speak with a customer service representative.

Engineering installation drawings are available upon request through SAF-HOLLAND Trailer Suspension Application Engineering - call 888.396.6501.

UltraLite Slider	Literature PDFs
Installation Manual	XL-MS175
