Product Change Notification - Air Chamber for Air Cushioned Snubber

Effective February, 2021

Attention

A change was made to the air chamber for the air cushion snubber used for pintle hooks in doubles and triples trailer applications. This change caused the overall depth across the chamber body halves to increase 2 mm (.08").

This change will affect the following product models and chamber assemblies.

- PH-210RA__ series, PH-210RF__ series
- PH-310RA__ series, PH-310RF__ series
- PH-405RA__ series, PH-405RF__ series
- PH-410RA__ series, PH-410RF__ series
- PH-400, PH-550
- Air Chamber sub-assemblies XA-02608, XA-10198
- Air Chamber XB-165945 ,XB-166321

This change will be implemented February 2021.

Fit, form and function remains the same with exception to the chamber body depth described above.

Mixing old and new air chambers will not jeopardize functional integrity.

There is no physical identifiable change to the air chamber other than the change described above.

If you have any questions or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 1-888-396-6501.
