

High-quality surface coating for brake carriers SAF SBS 2220 H01

In the course of continuous product development and optimization, SAF-HOLLAND will supply the SAF SBS 2220 H01 disc brake with part number 3 080 0097 00 / 3 080 0098 00 with a KTL-coated brake carrier from January 2021 at **no extra charge**.

This results in significantly improved corrosion protection and a more visually uniform appearance of the brake. **This upgrade of the brake has no influence on the homologation, or on the part numbers.**

Current version

New version

The changeover takes place in the following axle types:

B9-22S, BL9-22S, BLL9-22S, BI9-22S, BIL9-22S, BILL9-22S, BIM9-22S, BIZL9-22S, BI10-22S, SI9-22S, ZI9-22S

Customer benefits of the KTL-coated brake carrier:

- No extra charge
- High quality brake caliper
- Improved corrosion resistance
- Uniform visual appearance clamping unit and brake carrier
- No change in brake performance
- No influence on homologation

Changeover date: January 2021

The part numbers of the axles and air suspension units do not change.
