

SAF P89 Series Air Disc Brakes

Wheel Nuts

Starting June 2017, SAF-HOLLAND will provide optional wheel nuts in sealed packages attached to each wheel end. Trailer manufacturers will no longer have to remove each individual wheel nut from the wheel stud prior to installing the rims/tires at the assembly line. The wheel nut package will be securely attached to the wheel hub inside the protective wrap placed on each disc brake wheel end.

If you have any questions or require additional product assistance, please contact your SAF-HOLLAND sales or service representative at 888.396.6501, or visit www.safholland.us.
